Greater Noida, Uttar Pradesh - 201310, India

OBJECTIVE

Motivated IT professional with hands-on experience in software development and problem-solving, seeking to contribute technical expertise in Java, Android, and web technologies to deliver innovative and efficient solutions while growing in a dynamic organization.

EXPERIENCE

- CyberShield Technologies Private Ltd.** Nov 2025 – Present
Junior Software Developer Intern Greater Noida, India
 - Developing and maintaining Android applications using Kotlin and Java, following MVVM architecture.
 - Collaborating with product and QA teams to deliver features with clean XML UIs and smooth UX.
- MSME (External Tutor)** April 2025
Java Developer Indo German Tool Room Indore
 - Delivered comprehensive Java programming and Computer Fundamental training to students under the MSME initiative.
 - Simplified complex concepts through practical examples, boosting students' understanding of core Java principles.
 - Guided students in applying programming skills to real-world scenarios and assignments.
- Android Development Internship** Dec 2022- March 2023
Android Development Code Better (Indore), India
 - Developed Android apps using Java/Kotlin with REST API integration, Firebase services, and MVVM architecture.
 - Designed responsive UI/UX with XML, RecyclerView, and Material Design to ensure smooth user experience.

PROJECTS

- SkillGroww : Developed a mini LMS-based Android application focused on structured learning and user-friendly experience during internship, currently under active development.** 
Tools: Kotlin, XML (View System), REST, Room, Retrofit, Gradle
 - Built a scalable Android application using the Kotlin and XML-based View system for the delivery of structured courses.
 - Integrated REST APIs using Retrofit for efficient network communication and data handling.
 - Designed consistent UI/UX with proper Typography and Color Themes for improved user experience.
 - Collaborated with team members during the internship to align the design and development workflows.
 - Gained hands-on experience in Android architecture, API integration, and Gradle-based project management.
 - Successfully delivered the project during the internship; currently enhancing features in the development phase.
- SRS Security System: Developed a secure role-based system implementing authentication, authorization, and protected data handling to ensure controlled system access.** 
Tools: Kotlin/Java, Spring Boot, REST APIs, JWT, MySQL, Postman
 - Designed and implemented secure user authentication using JWT-based token mechanism.
 - Built role-based access control (RBAC) system to restrict endpoints based on user roles and permissions.
 - Secured REST APIs with proper validation, exception handling, and encrypted password storage.
 - Integrated database management for storing user credentials and access logs securely.
 - Tested API security workflows using Postman to validate authentication and authorization flows.
- Bill Generator App: Built an Android app to generate and print invoices via thermal printers, with inventory tracking for shopkeepers.** 
Tools: [Android – Kotlin, Room DB, XML, ZXing Library]
 - Developed an invoice generation app enabling shopkeepers to manage stock and print receipts using thermal printers.
 - Utilized Room Database to handle product inventory and billing data locally with high reliability.
 - Designed responsive UI using XML layouts tailored for quick billing workflows and mobile usability.
 - Integrated ZXing library for Bar-code scanning to streamline product selection and stock updates.

EDUCATION

- **LNCT University** 2023-2025
MCA(Master Of Computer Application) Bhopal, India
 - CGPA: 7.77 / 10.00
- **Bundelkhand University** 2019-2022
BCA(Hons.) Jhansi, India
 - Percentage: 66.8%

SKILLS

- **Technology:** Android, Web Development
- **Android Libraries:** Retrofit, Volley, ROOM
- **Programming Languages:** Java, Kotlin, c++, c, JavaScript
- **Web Technologies:** HTML, CSS, XML
- **Database Systems:** MySQL, SQLite
- **Build Tools** Gradle (Groovy DSL, Kotlin DSL)
